ComNav

Control your security alarm system from anywhere!

Advanced security and communication control to suit your lifestyle

Hills ComNav is a remote access integration module for the Hills Reliance security alarm system and Kocom video door phone intercoms. It allows you to easily access your security alarm system via telephone or internet anywhere in the world. Ever worry that you forgot to turn on your security system? Now with Hills ComNav you can easily phone your security system to check it's status and remotely turn it on or off.

With advanced intercom integration features, you'll even be able to talk to visitors at your front door when you are away from home. Now your security system is complete – both intercom and alarm systems are now connected together for complete peace-of-mind.

Hills ComNav - Remote Access Integration Module

- Remote access via any DTMF telephone - gives you control as if you were in front of your VoiceNav code pad! You can check the status, change PIN codes, arm and disarm your system, update entry\ exit messages on VoiceNav code pads, even fully program the system.
- Advanced Intercom Features - imagine being able to talk to a visitor to your home from your mobile phone while on holiday and being able to provide access.
- Personal Voice Guide (PVG) – a clear spoken voice guides you through the menus
- Advanced Reporting Features - security events can be reported to 3 phone numbers (the PVG will call and talk to you in a human voice), 3 mobile numbers via SMS (no SIM card required in Hills ComNav), and 3 email addresses.
- Web Server - user-friendly method for programming the ComNav or basic Reliance features.
- iPhone application in development

Hills Reliance VoiceNav
